Air Quality Hackathon
Dec 6-8th, 2023

This top-tier event is organized by **Tech to the Rescue** in collaboration with **Amazon Web Services (AWS)**. The hackathon is 100% online and gathers tech teams from all over the world.

We are engaging **tech industry leaders** as speakers and mentors as well as Air Quality experts to support teams to solve burning Air Quality challenges coming from the world’s leading nonprofits.

**The goal** is to develop innovative tech solutions which will increase the nonprofits’ positive impact.

[Visit event website here.](#)
Why Air Quality?

Air pollution is a silent killer considered one of the World’s most significant health and environmental dangers. It is causing 6.7 million premature deaths worldwide.

Our goal

To develop innovative tech solutions to 10 burning Air Quality Challenges, sourced from world’s leading nonprofits.

Our secret weapon

Early access to Bedrock AI by Amazon.
The impact story

We source burning Air Quality challenges from areas mostly impacted: South East Asia & Sub-Saharan Africa from world leading nonprofits.

Tech solutions developed will be ready to be implemented by the nonprofit organisations.

To boost the impact, we will be publishing an open access report to promote these solutions worldwide.

Air Quality Challenges will be announced starting Nov 7th 2023.
Submit a project

If you’re a registered non-profit, charity or non-governmental organization, you can request support via Tech To The Rescue.

Start by registering here:

https://www.techtotherescue.org/ngo#join
Working in teams, Air Quality Hackathon participants will benefit from:

- A dedicated **AI workshop** on the new **Amazon Bedrock** and **AWS Credits** to build their solutions
- Access to top industry **speakers and mentors**, who will be working closely with the teams (interactive sessions, private mentorship, chat)
- Challenges to hack sourced from **leading nonprofits** working on tackling air pollution
- 40 hours of a **shared online space and tools** for collaboration, learning and software development - competing with other leading tech players

Air Quality Hackathon
Dec 6-8th, 2023

Be a Mentor!

Provide mentorship and spark the innovation! Before the hackathon, you will be assigned to the Air Quality challenge. During the hacking days, you will share your knowledge and provide support to tech teams.

Participants can lean on your experience for advice, brainstorming, and expert opinions as they work towards their solution.

**Benefits:**
- Inspire the next generation of innovators
- Stay updated on industry trends and needs
- Expand your professional network

Be available and active during these event phases:
- **Wed, Dec 6th:** 2:45pm - 5pm CET - Intro & Mentor tech teams
- **Thu, Dec 7th:** 9am - 5pm CET - Mentor tech teams
- **(optional) Fri, Dec 8th:** Hacking stops at 8am CET. You are invited to watch the winners’ announcements at 4PM CET

Be a Judge!

As a judge, you hold the key to recognizing innovation. During the hackathon, your task will be to identify the most promising solutions created by hackers.

Your expertise will drive change towards cleaner, healthier air through the selection of projects that will shape the future.

**Benefits:**
- Champion innovation in Air Quality
- Be a catalyst for transformative change
- Gain fresh insights and inspiration

Your presence is crucial on: Friday, Dec 8th
- **8AM - 12PM:** Within this timeframe, you will evaluate submitted solutions to your Air Quality challenge and shortlist the top three finalists (*asynchronously with other judges from your challenge*)
- **2PM - 3PM:** Attend finalist presentations and choose the best solutions from your Air Quality Challenge within a small group of 3 Judges.

Hack to the Rescue is a tech activation programme of Tech To The Rescue.
